

M2000 Specifications

System consists of the following major components	
<ol style="list-style-type: none"> 1. Light Unit 2. Power Unit 3. Battery Unit 4. Battery Charger 5. Power Supply Cable 6. Light Unit Cable 7. Infrared Filter 	
Modes of operation	
<ol style="list-style-type: none"> 1. High beam (100% light output) 2. Low beam (Approx 50% of maximum light output) 3. Strobe mode (between 7 and 9 Hz) 	
Light Intensity	
11 million candela (Peak Intensity)	
Light Source	
Source:	Lamp type is a 175W short arc Xenon lamp (min 500 hrs life)
Color Temperature	5900° Kelvin
Beam Divergence	
Beam can be adjusted manually between flood mode (6°) and spot mode (2°)	
Infrared filter	
An IR filter is fitted by hand on the front of the light unit for covert or semi-covert use.	
Lens system	
Galilean Telescope
